

Say hello to LeakSmart.[®]

Leaks are inevitable. LeakSmart is *essential*.

Water is vital to living comfortably in our homes.

It flows through the core infrastructure of our homes and connects to almost every appliance we use on a daily basis.

Yet water in the wrong places can do more harm than good.

- ◆ Water damage is the **second most common** homeowner insurance claim.
- ◆ Homeowners are **3.5X** more likely to experience water damage than theft.

A leak. A burst pipe. An open tap.

- ◆ The average water damage claim in North America costs more than **\$8,000**.
- ◆ Preventable water damage occurs **every 12 seconds**.

**LeakSmart protects
what you can't replace.**

And stops water damage before it even starts.

**Water damage can
be unhealthy, costly,
and irreparable.**

And what is damaged, often cannot be replaced.

Water damage in hidden places.

Some leaks are readily apparent, such as dripping faucets and leaking water heaters.

Unfortunately, many leaks go undetected for years because the source of the leak is not visible.

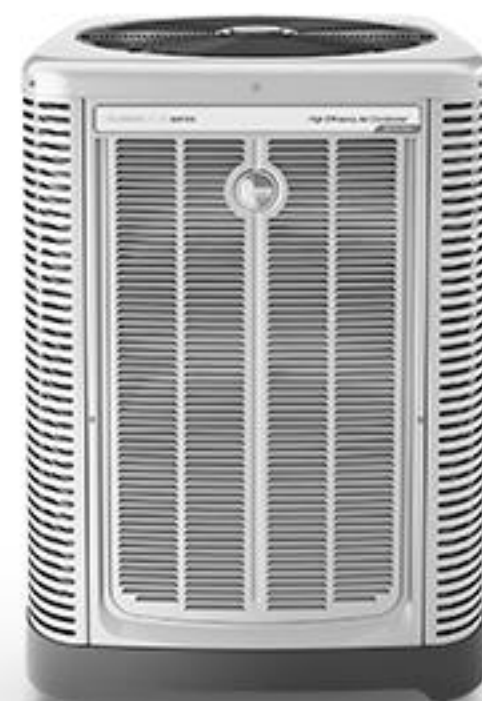

Sources of potential leaks.

All throughout your home, there are sources for potential leaks. Place your LeakSmart Sensors throughout the home near areas susceptible to water damage.

Washing Machine

Air Conditioner
HVAC Systems

Dishwasher

Sinks and Tubs

Refridgerator

Hot Water Heater

Toilets

Introducing LeakSmart

The world's most intelligent leak and flood protection system for your home.

Detects and stops water leaks in **5 seconds** or less.

How it works.

1. **LeakSmart Valve**

Install the LeakSmart Valve on your water main.

2. **LeakSmart Sensor**

Place the LeakSmart Sensors around your home.

3. **LeakSmart Hub**

Connect to the LeakSmart Hub.

4. **LeakSmart App**

Receive alerts and monitor your home via the LeakSmart App.

LeakSmart Shut-Off Valve

Automatically turns off main water supply.

The LeakSmart Valve connects directly to the main water supply and automatically shuts off the water in less than 5 seconds in the event of a leak.

LeakSmart Sensor

Monitors both leaks and temperatures in your home.

Protect your most high risk areas, including washing machines, water heaters, bathrooms, and HVAC units. Designed to fit into tight spaces, without shifting or sliding.

Sensors send the signal to shut off water within 5 seconds and alerts you of a leak immediately.

LeakSmart System Hub 2.0

**Communicates between
the sensors, the valve,
and you.**

The hub is the central point of communication.
The LeakSmart System will continue to work 24/7
even if Internet & power are down ensuring that you
will be protected 100% all of the time.

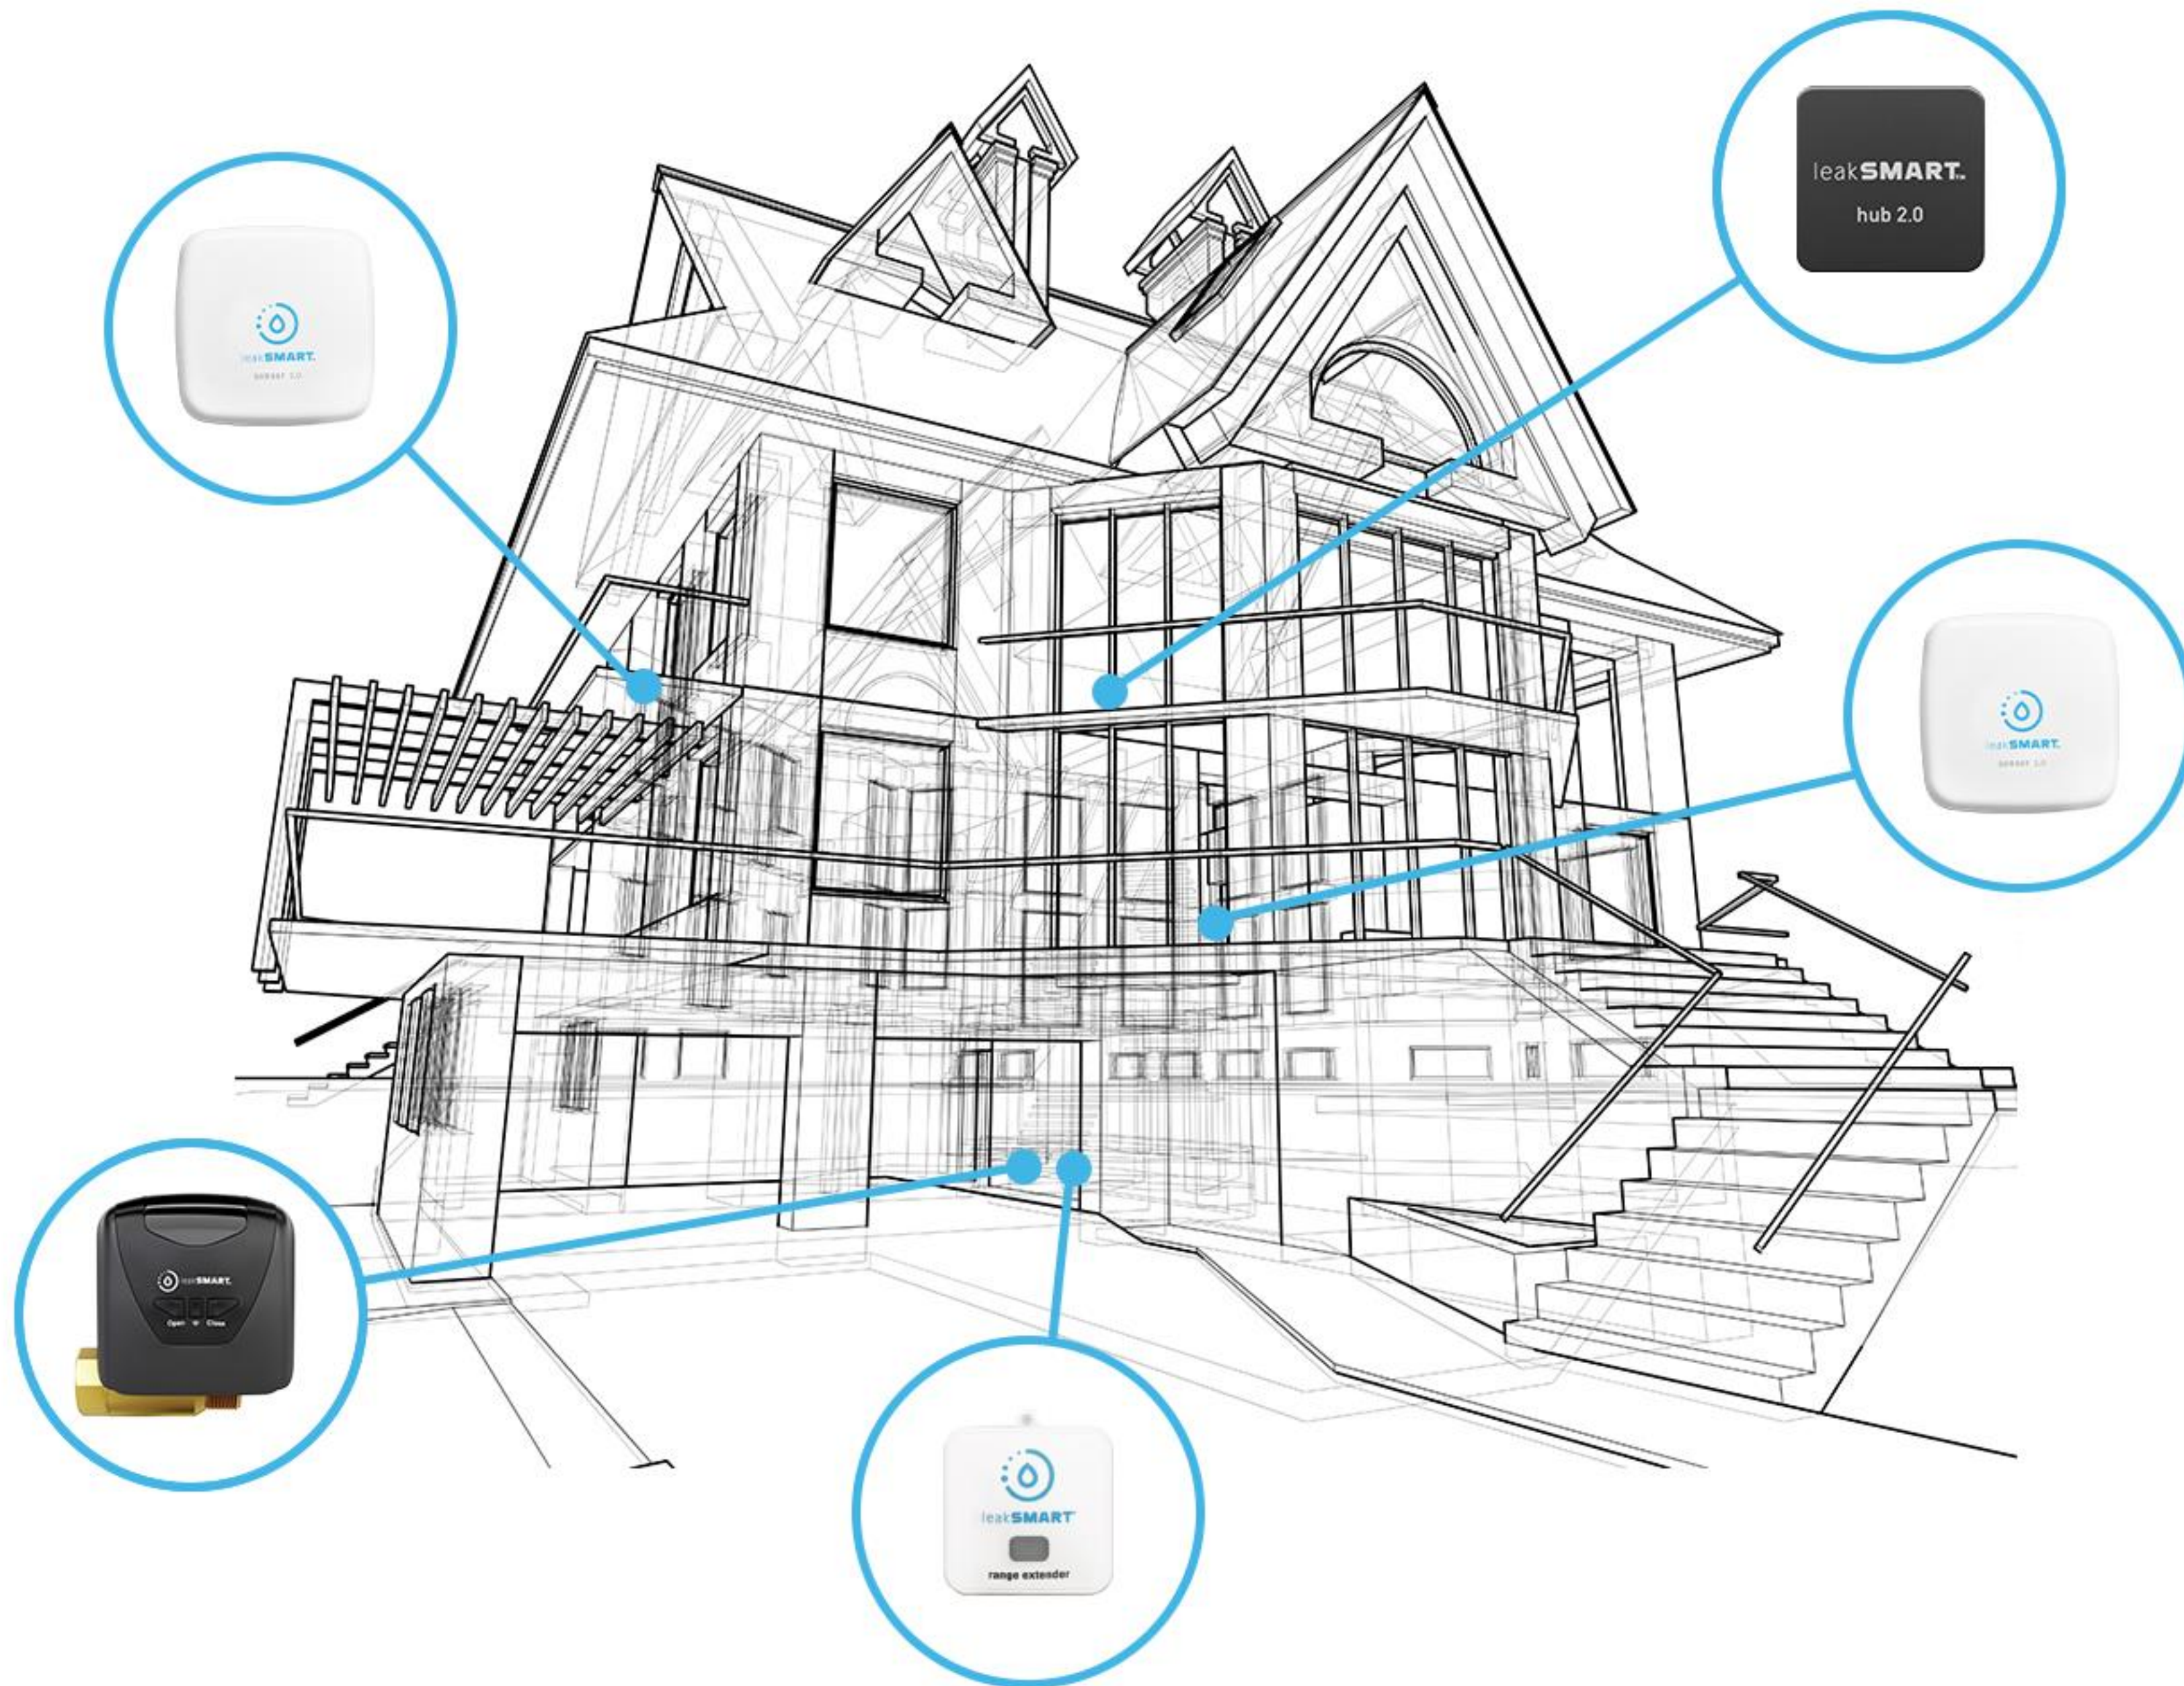

LeakSmart App

Turn off your water from anywhere 24/7.

Receive text and email alerts for leaks and monitor freeze detection.

Turn off your water from anywhere 24/7 to protect your home from water damage caused by leaks.

Scalable

LeakSmart provides complete home protection from water and freezing temperatures for homes up to 5,000 sq. ft., scalable up to 32 sensors.

Range extenders available for extra large homes.

Install the LeakSmart shut-off Valve indoors or outdoors with available LeakSmart protective cover.

Sensible Smart Home integration

LeakSmart works on its own or with other Smart Home platforms.

wink **iris**
by Lowe's **nest**

 SmartThings

Works with Nest.

Protect your HVAC system

If a leak is detected near a HVAC unit the user will be prompted to turn off the Nest thermostat.

Protect your home when away

If the Nest thermostat detects that you are away for more than 48 hours, you will be prompted to turn off your main water supply.

Get notified if a leak is detected

If a leak is detected the user and the user's emergency contact will be notified.

LeakSmart Demo

Annual Rebates

Most home insurances will extend annual insurance rebates for installing a LeakSmart System.

PROGRESSIVE

Check with your local insurance company for discounts.

A brand you can trust.

State of the art technology trusted by industry leaders.

“Some of the best ideas I saw at CES were not from the big manufacturers but from start-ups... [for example] LeakSmart detects leaky water pipes and shuts off the supply.”

“Making your house into a smart home means that you'll want to upgrade every aspect of it... LeakSmart is a smart water valve that can detect irregularities in your home's water flow and notify your smartphone, hopefully preventing costly repairs.”

“21 Gadgets that prove the smart home of the future is almost here... Leaksmart detects and stops leaks.”

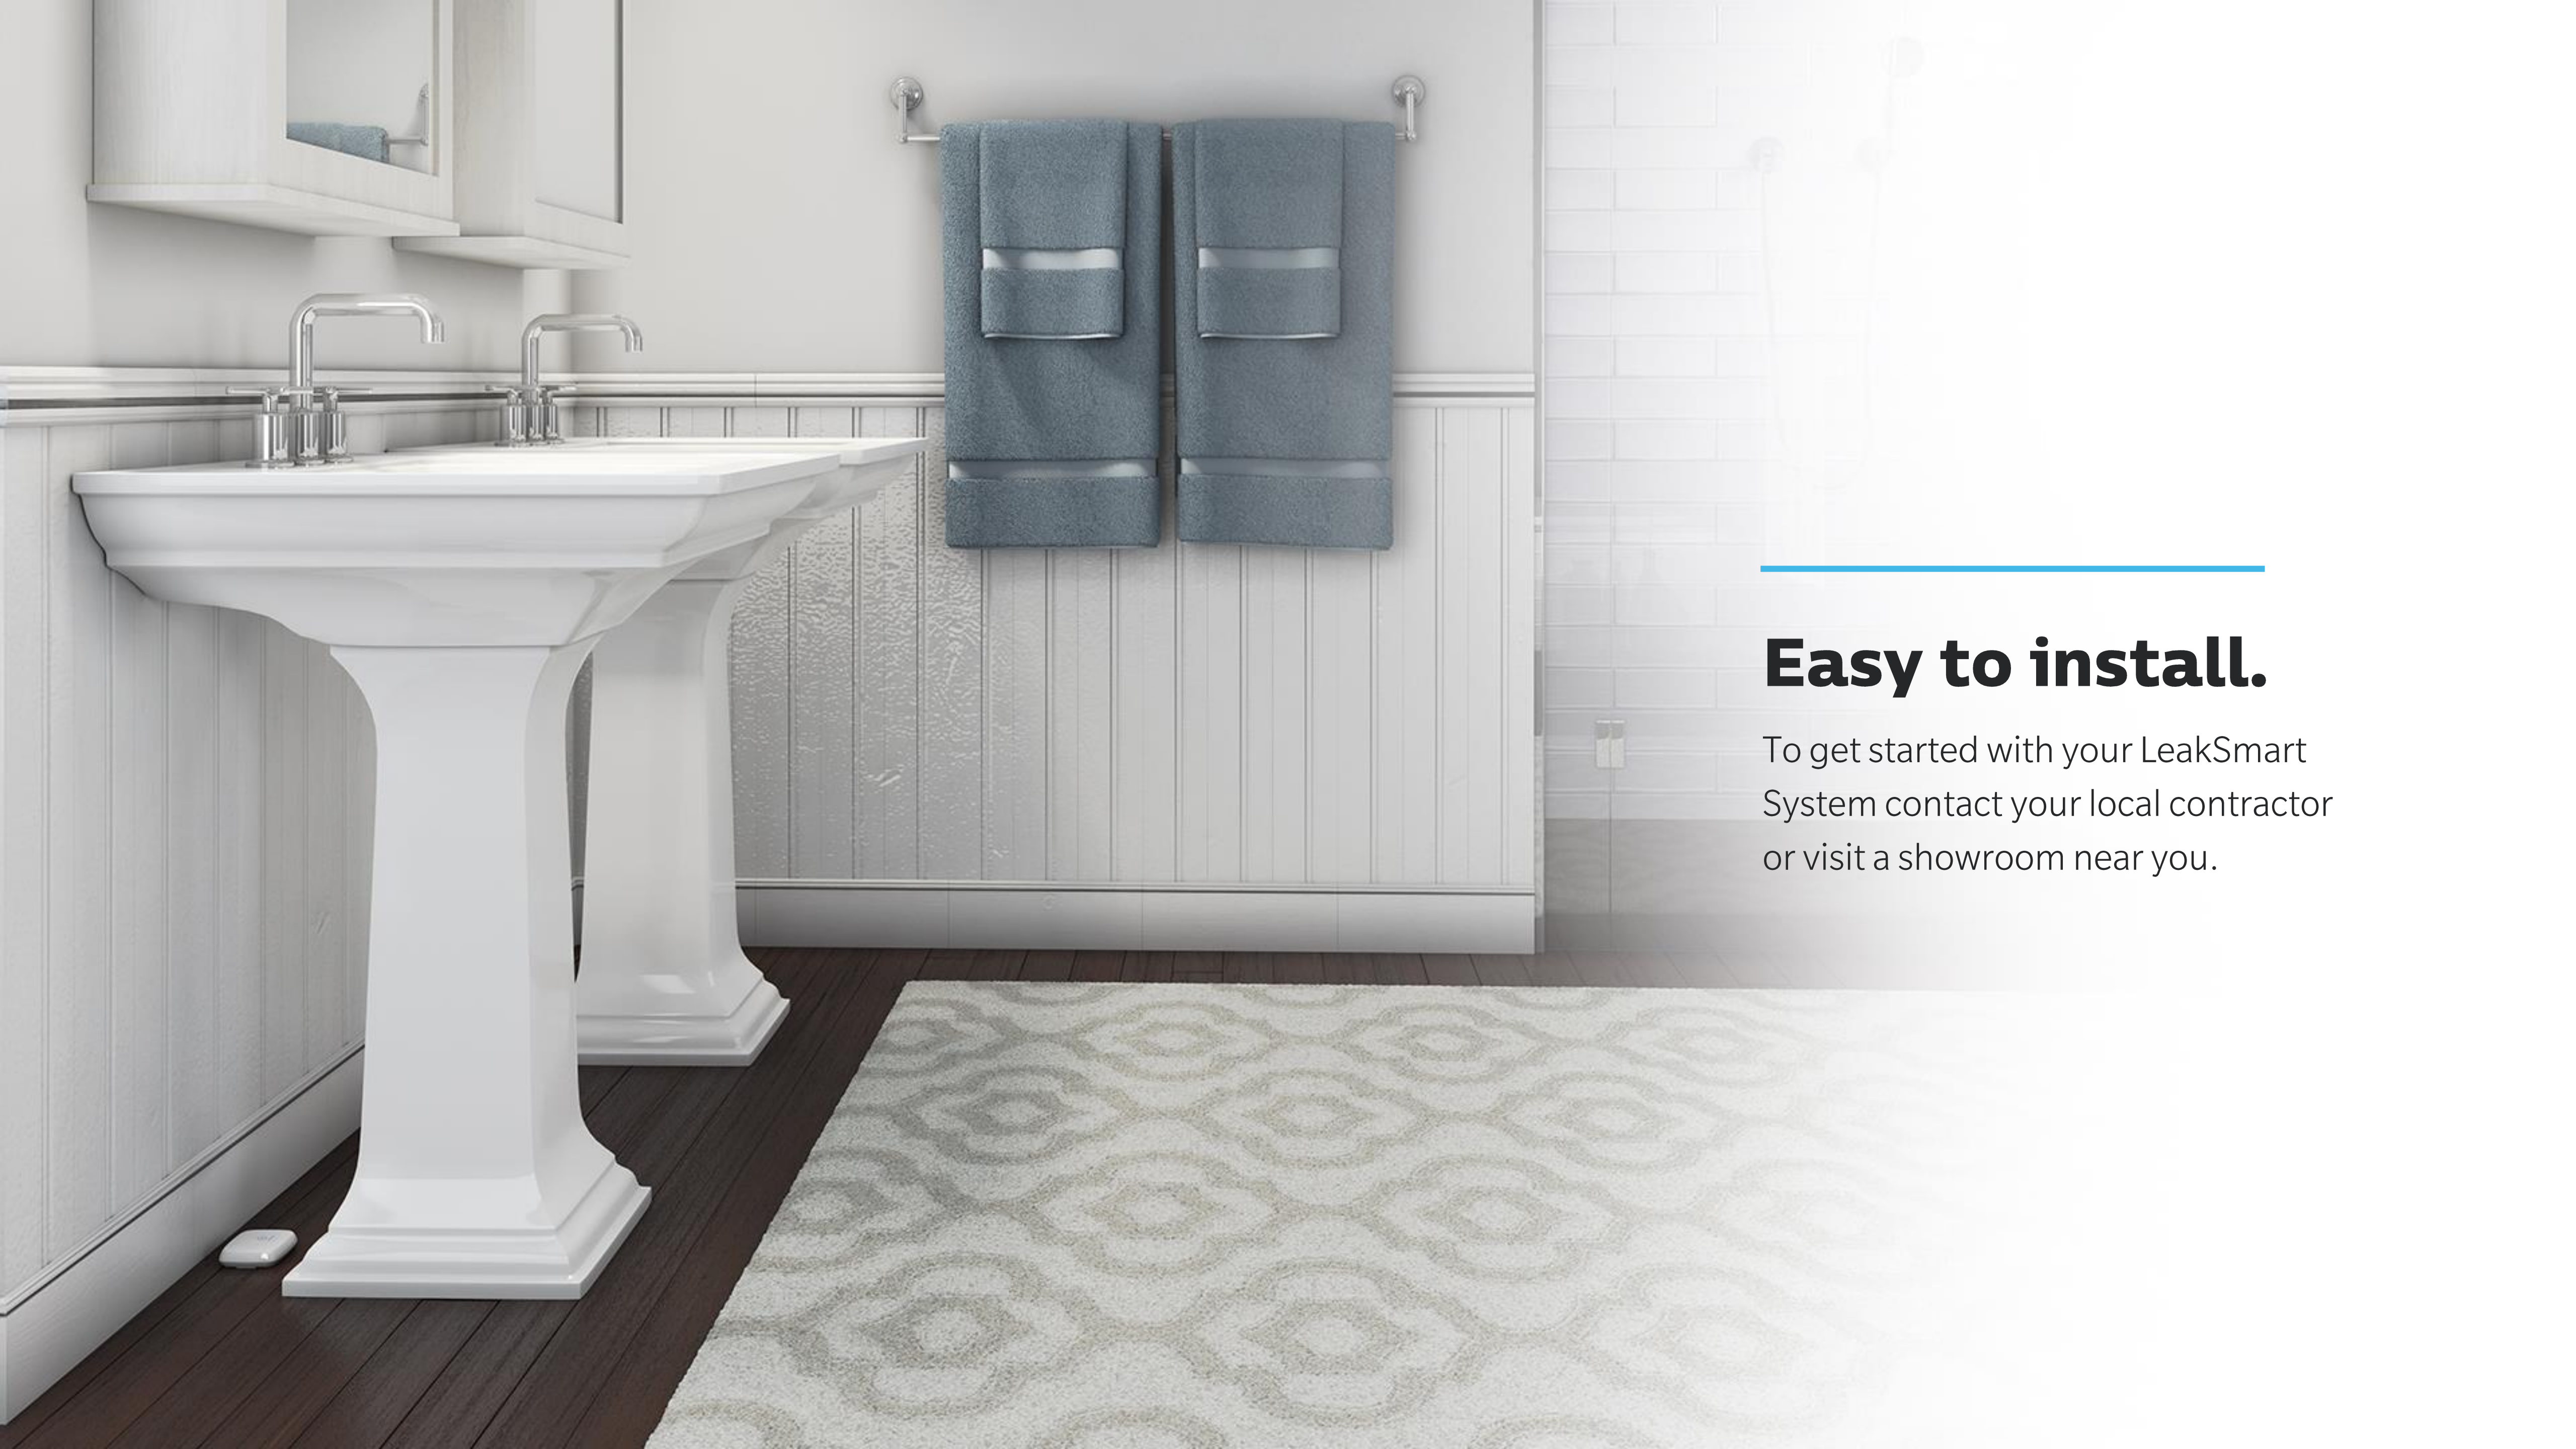

“Unfortunately, most leak detectors are tied to specific smart home systems. One comprehensive independent smart spillage sensor and stopper, however, is leakSMART.”

Even your backup plan has a backup plan.

LeakSmart will continue to work even if your Internet goes down thanks to ZigBee—a reliable and secure radio frequency for smart home devices that protects your home 24/7 even without WiFi.

Easy to install.

To get started with your LeakSmart System contact your local contractor or visit a showroom near you.
