

# Six reasons why you should consider the OmnipureBlock™

Available in every existing filter body including the K-Series with Quick-Connect® fittings as shown here.

Double O-ring seals eliminate the possibility of bypass.

Highly compressed block carbon eliminates media migration and carbon fines.

Engineered for radial flow which results in an even distribution of water over the entire filter and reduces pressure drop.

Available in multiple media configurations to address specific water filtration needs.

The most effective media available for the virtual elimination or reduction of:

- Lead and cysts down to 1 micron
- Scaling deposits
- Undesirable tastes and odors

Available in all Omnipure filter bodies as well as cartridge elements.

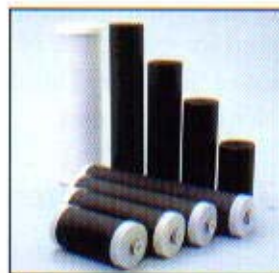

The K-Series with the unique Quick-Connect fittings

The Q-Series with the innovative Twist-Tap shut off valve and replaceable body.

The E-Series designed as a replacement body for existing permanent head systems.

The OC Line of cartridge elements available for most standard housings.
